36. In the case of the National Standards and Guidelines for conservation, the federal government worked with each of the provinces and territories to establish a uniform approach that all agreed to. A similar process could establish a country-wide standard for school curricula that was not imposed by the federal government, who does not have responsibility for education, but that would be agreed to by the territories and provinces.
37. Since this research was conducted ICOMOS Canada has produced an excellent new teaching guide focused on industrial heritage. This provides a great example of material that can be promoted to Schools, School Boards and Ministries of Education.
